

## **Information Security Policy**

One Sky Solutions Lab S.r.l (OssLab Srl) considers the information that users entrust or process through the services that they have at their disposal as a valuable asset. For this reason, OssLab Srl guarantees to protect and improve these services by ensuring that the information is accurate, thorough and well-protected against misuse, unauthorized disclosure, damages and/or losses.

This Information Security Policy, confirms the commitment to guarantee the security of the information and the logistical and organizational tools which are used to process all the activities involved. It also aims to guarantee confidentiality, integrity and availability for all critical or sensitive information that it is entrusted, by carrying out the appropriate verifications needed to prevent that these requirements are breached.

The objectives of the information security policy are:

- To consolidate the company's image as a reliable and competent data manager;
- To protect its information assets related to PALM activities;
- Gain a competitive advantage over other market players who offer similar services, by highlighting the importance One Sky Solutions Lab confers to the information it is entrusted;
- Avoiding, up to a feasible extent, disruptions to the PALM portal;
- Take measures to ensure staff loyalty and professionalism;
- Fully comply with provisions pursuant to current and mandatory legislation;
- Increase the level of awareness and competence of its staff on safety issues.
